

BHUMIKA NISHAD

SDET / QA Automation Engineer | FinTech | Printing Domain | 9+ Years

Bangalore, India | +91 8618769604 | nishadbhumika@gmail.com

[linkedin.com/in/bhumikanishad](https://www.linkedin.com/in/bhumikanishad) | github.com/nishadbhumika

PROFESSIONAL SUMMARY

SDET / QA Automation Engineer with 9+ years of experience delivering robust automation frameworks across FinTech and enterprise printing domains. Proven track record in UI and API automation, CI/CD integration, and stakeholder-facing delivery — including direct production deployments for live banking clients. Currently building GPT-4 and LangChain-powered agentic test systems that reduce manual effort at scale.

CORE TECHNICAL SKILLS

Automation: Selenium WebDriver, RestAssured, TestNG, JUnit, POM, FitNesse

Programming: Java, Python

API Tools: Postman, SoapUI, Swagger, JSON, XML

DevOps & CI/CD: Jenkins, GitHub Actions, Docker, Maven

Cloud: AWS (EC2, RDS, API Gateway)

Database: Oracle SQL, MongoDB

Testing Tools: JMeter, Selenium, RestAssured

Test Management: Xray (Test Writing, Execution & Reporting in Jira)

Debugging: Log analysis, root cause identification, defect triage across UI, API, and backend layers

Methodologies: Agile / Scrum

OS & Platforms: Linux, Windows, macOS

Project Tools: Jira

PROFESSIONAL EXPERIENCE

Tech Lead – Agentic AI & QA Automation | [Ascendion Engineering Pvt Ltd](#) | 2025 – Present | Bangalore

- Leading QA automation for enterprise-grade printing and cloud device management platforms used globally.
- Developed scalable UI and API automation frameworks reducing manual regression effort by ~70%.
- Designed intelligent automation agents using GPT-3/GPT-4 and LangChain to automate test case generation and defect triage, reducing analysis effort by ~60%.
- Integrated automated suites with Jenkins and GitHub Actions pipelines, improving release cycle time by ~40%.
- Automated workflows like print job routing, firmware validation, device onboarding, and cloud synchronization across Windows, Linux, and macOS environments.
- Performed performance and load testing using JMeter to validate throughput, concurrency, and system stability.

Professional QA Engineer | [Fiserv India Pvt Ltd](#) | 2017 – 2024 | Bangalore

- Owned end-to-end QA for Payment and Card Control modules across mobile banking platforms, covering transaction flows, card provisioning, spend controls, and real-time alerts.
- Served as primary QA point of contact for a live banking client over a 1-year engagement — participated in stakeholder meetings, coordinated production deployments, and ensured release sign-off.
- Automated mobile banking APIs and backend services using RestAssured, TestNG, and Postman, significantly improving regression speed and coverage across digital banking platforms.
- Developed UI and API automation frameworks for OneView and digital card management systems, reducing manual regression cycles and improving release confidence.
- Performed end-to-end testing for Android and iOS financial applications, validating payment flows, transaction logging, data masking, and security compliance.

- Executed cloud deployment validation on AWS EC2, RDS, and Unix-based servers ensuring stable and reliable test environments across release cycles.

KEY PROJECTS

Enterprise Printing Automation Platform | Ascendion Engineering Pvt Ltd

Designed and automated onboarding workflows for newly enrolled customer printers including device identification, configuration setup, secure cloud registration, and capability validation. Built Python-based automation with AI-assisted logic for onboarding intelligence and self-recovery workflows. Automated print job routing, firmware updates, and cross-OS compatibility. Improved scalability and drastically reduced manual validation cycles.

OneView – Unified Mobile Banking Platform | Fiserv India Pvt Ltd

Unified banking platform integrating multiple financial institutions into a single mobile app. Automated UI and API workflows including account aggregation, EMI, transaction history, notifications, and digital identity validation. Performed AWS deployment validation using EC2 and RDS and backend SQL log verification ensuring system reliability and data integrity.

Digital Card Management Platform | Fiserv India Pvt Ltd

Automated full digital card lifecycle including provisioning, transaction enrichment, fraud alerts, lost/stolen reporting, and secure PIN operations. Built reusable framework components enabling parallel execution and expanding automation coverage significantly.

EDUCATION

Master of Computer Application (MCA) | CSVTU, Bhilai | 2014 | CGPA: 8.03/10

Bachelor of Computer Application (BCA) | RCET, Bhilai | 2011

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 AI Foundations Associate | Oracle | 2025
